

## A Formulation of a Topical Liniment from Avocado (*Persea Americana*) Seeds

### ABSTRACT

5           A formulation for a topical liniment utilizing avocado (*Persea americana*) seeds as a primary base. The composition comprises a weight ratio of 4:2:1 of avocado (*Persea americana*) seeds, coconut meat, and ginger, respectively. This mixture is extracted and processed under controlled low-heat conditions to maintain stability. The resulting oil is blended with peppermint oil and menthol crystals to provide therapeutic and cooling properties. The utility model provides an antioxidant-rich, stable alternative to traditional liniments by utilizing locally available agricultural by-products.
