

Composition of Banana-Turmeric Cookies

ABSTRACT OF THE DISCLOSURE

The present utility model relates to food products but more specifically
10 to the production of banana-turmeric cookies. The utility model addresses the
problem of conventional cookies relying heavily on imported wheat flour and
offering limited nutritional and functional benefits, as well as the underutilization
of indigenous crops such as honey banana and turmeric. Disclosed is a
composition of banana–turmeric cookies consisting following weight ratio:
15 34.86% of banana flour; 2.79% of turmeric powder; 15.77% of butter; 27.9% of
sugar; 13.95% of egg; 4.19% of evaporated milk; 0.33% of baking soda; and
0.21% of salt.
